Applications

- High-fidelity amplification (>100x Taq) & sequencing
- dUTP tolerance & incorporation
- Damaged DNA (FFPE samples)
- Epigenetic & methylation studies
- AT- and GC rich templates
- [Carryover contamination prevention](#)

Applications

- High-fidelity amplification (>100x Taq) & sequencing
- dUTP tolerance
- Damaged DNA (FFPE samples)
- Epigenetic & methylation studies
- AT- and GC rich templates

Why switch to this product?

- Can [incorporate dUTPs](#) for many different applications
- Excellent [quality-price ratio](#) based on the customer feedback
- [Kit format](#) for more personal usage.
- Shipping on room temperature and reaction setup without ice

Why switch to this product?

- Tested [benchtop stability](#) up to 24h
- Superb [inhibitor tolerance](#)
- [Universal](#) & [robust](#) amplification
- Convenient [premix](#) format
- Shipping on room temperature and reaction setup without ice
